“Transformation of the Aviation Industry”

ENRICO SCHARLOCK

Industry Director Aerospace & Defense
DASSAULT SYSTÈMES

JAMES KORNBERG

Industry Expert Aerospace & Defense
DASSAULT SYSTÈMES

The aviation industry has hit turbulent times recently. And with things up in the air, airlines, airports, ground handlers, and air traffic controllers struggle to adapt to such volatile circumstances. How do they handle sharp fluctuations in traffic, forecast disruptions to minimize impact, and make long-term plans? Dassault Systèmes and DELMIA Quintiq have had a long track record of helping our customers simplify the complexities of the industry and provide solutions to future-proof operations.

“Aviation Workforce Planning in Turbulent Times”

TIINA LAHTI

Head of Ground Resource Planning
FINNAIR

In recent years, Finnair has had to endure significant disruption caused by massive flight restrictions due to major international crises such as the COVID-19 pandemic and more. These disruptions have led to rapidly changing situations that have made workforce forecasting and planning incredibly challenging. The DELMIA Quintiq workforce planning solution has been a valuable tool in helping Finnair to adapt well to these turbulent times.

“Boosting Handling Through Improved Production Planning”

MARCUS MILLA

Team Lead Application Dev & Maintenance
LH Cargo

CHUDI UDEOGU

Product Owner Cargo Planning IT
LH Cargo

Discover how to unlock operational excellence in the Aviation industry with the DELMIA Aviation Showcase. Gain insights into how Lufthansa Cargo AG implemented a new approach to production planning in order to boost handling performance. Don't miss this presentation, which features:

- An introduction video to Lufthansa Cargo AG
- The DevOps setup at Lufthansa Cargo AG
- Their transformation journey from a manual to digital handling process
- The company's outlook, roadmap and strategy moving forward

Expert Panel Discussion

“How to get back and adapt to the New Normal”
